**William B. Tuthill : Late Victorian Interiors and Interior Details (Dover Architecture)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Late Victorian Interiors and Interior Details (Dover Architecture):

2 of 2 people found the following review helpful. Tons and tons of sketches/drawings, all pencil ... black and whiteBy CemeI built a French Victorian Dollhouse for my niece ... when it came to floors, crown molding, base board, wallpaper, I figured I was good, but in order to get the interior wainscot and woodwork, I was a little concerned. This is all black and white drawings/sketching/advertisements. Great drawings of staircases, shops, banisters, posts, window panels, frames, doors, bookcases, etc. I wish some where in color, but overall lots of pictures.3 of 3 people found the following review helpful. It is OKBy JennaVery few plates. Though there was a lot of written information

which was very informative. I would of rather had both the the long written chapters and then some more plates to go with it! Just too few in this book AND they were SMALL and hard to see the details! If not for the written information which was interesting it would of received a poor rating. 1 of 1 people found the following review helpful. If you are looking for home design and architectural details ...By Mr. Sterling If you are looking for home design and architectural details (I am an architecture student and huge fan of the Victorian style), THIS IS THE BOOK. I have bought six or seven from various other authors and none were as satisfying as this one.

The first high-quality reprint of a rare guide, this reproduction of an 1882 publication features fifty-two plates of original interior designs. Author William B. Tuthill (1855-1929) is best known as the architect of Carnegie Hall; he also lectured at Columbia University, was a founder of the Architectural League of New York, and served on the Art Commission of Chicago's 1893 Columbian Exposition. His designs are accompanied by those of other prominent American architects, including Gould Angell, Burnham Root, Rossiter Wright, L. B. Wheeler, and Edward Dewson. Tuthill's selections of illustrations include elevations and details of fireplaces, staircases, windows, parlors, libraries, and other interiors of residences, offices, and stores. A practical guide for nineteenth-century architects, carpenters, and builders, this volume remains a fine resource for historians, curators, preservationists, and Victorian home restorers. This edition is enhanced by a selection of advertisements that appeared in the original publication.

About the Author Best known as Carnegie Hall's architect, William B. Tuthill (1855-1929) lectured at Columbia University, was a founder of the Architectural League of New York, and served on the Art Commission of Chicago's 1893 Columbian Exposition.
